Peabody Road overpass

City of Fairfield prepares to pour concrete deck

Fairfield, California (Tuesday, May 17, 2016)—A 1000 cubic yard concrete deck pour is planned for the Peabody Road overpass beginning on May 24, and will last approximately two days. The work will start the evening of May 24, and will be completed the following day May 25—crews will work during the nighttime over the railroad tracks while rail traffic volume is at its lowest, and the weather conditions are acceptable.

The installation of concrete deck is a major component in the construction of the overpass. The City of Fairfield is looking forward to this milestone in construction on this project, and to reopening the road by mid-August this year.

The construction of the Peabody Road overpass is part of the construction of the Fairfield/Vacaville Train Station. For more information about the project, visit www.fairfield.ca.gov/trainstation or contact Construction Manager Tom Martian at (707) 428-7478.
